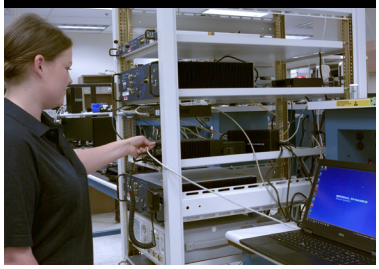
# URC-300™ Transceiver

## Redefining Software Defined

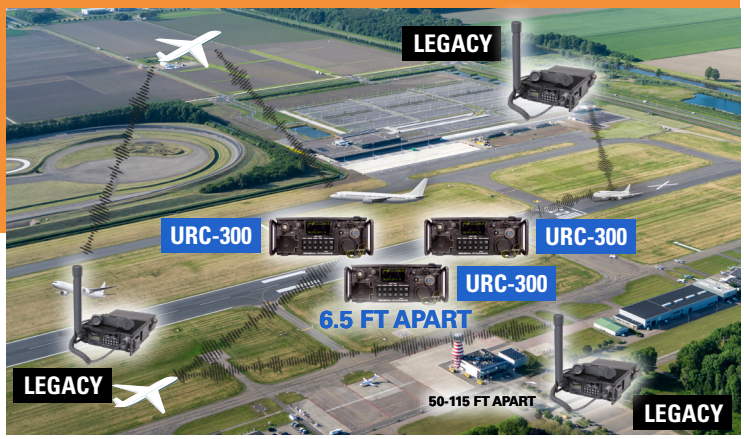
Supports **VHF** and **UHF** frequency bands

**Ideal** for grab-and-go, rackmount, vehicular applications

**Software-Defined with true field upgradeability**



**Maximized RF Performance**
enables close proximity operation as close as **6.5 ft** vs 50-112 ft. required by typical radios



**Smaller and Lighter**
than the URC-200, 2 radios can fit side-by-side in a standard rack

**Glove-friendly,**
intuitive, easy-to-use interface

**Ruggedized for Outdoor Environments**

SHOCK · VIBRATION · ALTITUDE · HUMIDITY · TEMPERATURE

**Compatible with the URC-200 (V2) radio and many of its accessories**

**Certifications Obtained in Advance by General Dynamics eliminate purchase, deployment and spectrum approval delays and enables global operation**

CE ETSI FC NTIA

**Improved battery life and additional input power options**

**Maintainer Web Application enables user to connect and control the radio's interface via a common web browser**
